This will be a hands-on living history experience which will give us an opportunity to travel back in time to the 1500's to learn firsthand what it was like to live in the Delaware Valley as a Native American just before contact with European settlers. Trained educators dressed in authentic buckskins will show us:

- What kind of medicines the Lenape used and where to find them
- How food was cooked and stored
- What kinds of animals they hunted and uses for all parts of the animal
- How the Lenape made bowls and other artifacts from nature
- How to plant a Three Sisters' Garden and what foods were foraged
- What kind of houses they lived in and Lenape social structure
- How to make a fire by friction using only natural materials
- How to make rope from natural materials

This experience will be an exciting follow up to our "Traces of Lenapehoking" program at our January 24th meeting. This program should be very interesting for all ages. Children are welcome!
